Projects

Transformer Monitoring

The project is aimed at designing and developing a low cost IOT based remote monitoring of power and distribution transformers through sensors and microcontroller and storing the measured data in the cloud. Some system are existing for checking transformer conditions, but most of them are accessible only for officials, normal people suffers a lot regarding power supply issues. The proposed system can measure, record and analyze various transformer parameters like current, voltage, chance of fire etc

Education

Bachelor of computer application

Don Bosco College mannuthy, Thrissur
2021-2024

Higher secondary school

St. Thomas Higher Secondary School
thope, Thrissur
2019-2021
Overall percentage 93.58%

SSLC

Holy Angel's Higher secondary school
Ollur, Thrissur
2018-2019
Overall percentage 95%

Extracurricular Activities

Active volunteer in National Cadet Corps (NCC)

Achievements

Achieved an internship certificate from
IDatalytics Infopark
